

Q.1) Write a Python program which accepts the user's first and last name and print them in

reverse order with a space between them.

```
firstname = input("Enter your first name: ")
```

```
lastname = input("Enter your last name: ")
```

```
print(lastname + " " + firstname)
```

Q.2) Write a Python program to print the calendar of a given month and year.

Note : Use 'calendar' module.

```
import calendar
```

```
year = int(input("Enter your year: "))
```

```
month = int(input("Enter your month: "))
```

```
print(calendar.month(year, month))
```

Q.3) Write a Python program to calculate number of days between two dates.
[use datetime module]

Sample dates : (2014, 7, 2), (2014, 7, 11)

Expected output : 9 days

```
from datetime import date
```

```
date1 = date(2014, 7 , 2)
```

```
date2 =date(2014, 7 , 11)
```

```
diffrence = date2 - date1
```

```
print(diffrence.days, "days")
```

Q.4) Write a Python program to test whether a passed letter is a vowel or not.

```
vowel = input("Enter the character you want vowels: ")
```

```
if vowel in "aeiou":
```

```
    print("yes")
```

```
else:
```

```
    print("no")
```
